
Bringing Smart Parcel Lockers to Your Parish - Introducing Pebble

From The Pebble Team <hello@pebblelockers.com>

Date Wed 7/2/2025 11:01 AM

To Lydia Hopton <clerk@saxilbyparishcouncil.gov.uk>

Dear Lydia Hopton,

We hope that this message finds you well.

We're getting in touch to introduce **Pebble** - the UK's first rural-focussed, open-access smart parcel locker network - and to explore whether your parish might be interested in becoming a part of it.

Pebble works by placing secure, 24/7-access parcel lockers in local community locations such as village halls, parish car parks or community-owned land. These lockers:

- Improve delivery and return access for residents
- Help reduce van traffic and carbon emissions
- Reduce courier emissions through our direct injection model
- Generate local income via a per-parcel revenue share for the host site

We are currently identifying potential host sites and we believe that Saxilby could benefit from this initiative. We would welcome the opportunity to discuss it further with you.

For your convenience, we've attached a **Parish Information Pack** outlining how Pebble works, the benefits to your community, and what's involved in hosting a locker.

If you have any questions or would like to arrange a short call or meeting, please don't hesitate to contact us at hello@pebblelockers.com.

We'd love to hear your thoughts.

Kind regards,

The Pebble Team
