

Saxilby and District MUGA Update

April 2022

- The planning application remains lodged with WLDC and is now expected to go on the April planning committee following the further reports being obtained:
 - The cricket ball strike risk assessment has been received and the report is being passed onto with WLDC by the architects. The recommended mitigation will ensure cricket and the MUGA can co-habit the same site.
- Full Council will need to consider the VAT report on the scheme and agree the position.
- Following securing planning permission, the architects will develop the draft tender and specification, which will be shared with the Working Group for comment and will be shared with Full Council for final sign off.
- The current timeline being worked to is for the facility to be ready for September 2022, if planning and the remaining funding is successfully secured. This is also now dependent on the outcome of the eventual legal position of the memorial field between the parish council and memorial field trustees.
